EXPERIENCE

Software Engineer at **Lola.com** • Boston, MA • June 2019 - Current

- Owned the front-end development of Lola.com's rental car platform and ensured the project's success from initial technical planning to product launch.
- Improved the organization's front-end interview process by collaborating on a small team of engineers to develop and test new, more comprehensive and relevant questions and rubrics.

Software Engineer Co-op at **Datawheel** • Cambridge, MA • January - May 2018

- Built a public facing React web application for Verizon that allows users to explore data through interactive visualizations.
- Implemented new features and developed solutions to bugs in D3plus, an open-source JavaScript data visualization library.

Technology Director at **Scout Studio** • Boston, MA • July - December 2017

- Provided guidance and mentorship to student developers building websites and mobile applications for clients.
- Led code reviews and met regularly with clients and developers to ensure the quality and maintainability of software.
- Discussed company needs with clients to determine technical requirements and select appropriate technology solutions.

Software Engineer Co-op at **TakeShape** • Brooklyn, NY • January - July 2017

- Worked full-stack to implement new features and develop solutions to bugs in TakeShape, a content management system, API generator, and static site generator.
- Collaborated with designers to build UI's with React and Redux.
- Utilized the Serverless Framework with AWS to grow and maintain TakeShape's infrastructure.

Software Engineer Intern at **ClassForward** • Cambridge, MA • August - December 2016

- Refactored front-end from jQuery to AngularJS on ClassForward, a video-based platform that allows teachers to share classroom videos with coaches.
- Designed and implemented new features in ClassForward, including a tool that allows instructional coaches to record and share audio messages with teachers.

Software Engineer Co-op at **Vistaprint** • Waltham, MA • January - July 2016

- Recreated legacy internal tools as modern Node.js and .NET web applications.
- Conducted interviews with software developers to determine requirements and design internal tools.

EDUCATION

Northeastern University

Bachelor of Science in
Computer Science and Interaction Design

Graduated May 2019

3.86/4.00 GPA

SKILLS

JavaScript (ES6)

React • Redux • Node.js • Express • D3 • AngularJS • Knockout.js

HTML • CSS (SASS) • GraphQL (Apollo Client) • Java • SQL • Git

Design

Sketch • InVision • Adobe InDesign
